

STAY SAFE ONLINE

Keep this card near the phone.

1

Never click links in SMS or email from numbers you don't know.

Real banks, the ATO, and Australia Post will NOT ask you to click a link to fix a problem.

2

Never give anyone remote access to your computer.

If someone calls saying 'your computer has a virus' - hang up. It is a scam.

3

Never share your PIN, password or one-time code.

No real bank, no real Telstra, no real Microsoft staff will EVER ask for these.

4

Always go to websites yourself.

Type the address into your browser, or use a bookmark. Do not click links from messages.

5

If something feels wrong, stop. Call family first.

When in doubt, ring your grandchild before you do anything. We don't mind.

When in doubt - HANG UP. CALL FAMILY.
